SUBJECT

Underground Drainage and Town Improvements in Bolen and round the temple

Drainage Scheme of Belur Town

Continuation Sheet | Ml File No 9567 of '44 | Page 2544/L

Current No

Letter no C 349-7 dt 9/10 Oct 1944 from the Director of Public Health, applying for the orders of Govt in the matter of the Govt's meeting the excess cost, in equal proportions with the Belur Municipality, of Rs 3,220/- over the sanctioned estimate of Rs 4,360/- involved, accepting the lowest tender quoted at 80% for the I stage of the Drainage Scheme of the Belur Town,

1. In the G O no 28693-6/ml 77-43-16 dt 18 2 44 an estimate, for the I stage of the Drainage work in question, so sanctioned As no tenders were received, when called for by the Sanitary Engineer fixing the last date on 8-7 44, local quotations were resorted to after giving due publicity, when one Mr BS Krishna Murthy has quoted the lowest quotation at 80% over the sanctioned estimate This is calculated to result in an excess expenditure of Rs 3,200/-.

2 The D P H recommends that the excess expenditure will be met by the Govt & the Belur Town Municipality in equal proportions

3 The matter is also referred to the DC obtaining the opinion of the local body in the matter of meeting the extra cost.

4. Orders of Govt is sought on the point referred to in para 3 supra, & afford the receipt of the views of the local Authority thro D C will be awaited & the file referred to G O to the C E for scrutiny & remarks For orders

13/11/44

Drainage scheme for the Belur Town

Continuation Sheet | File No / Current No | of 44 | Page

5) The point for consideration is whether the question of the tenders and Kesterwatching for the work, missing viz an increase of 80% over the A sanctioned estimate may be accepted & the work ordered to be proceeded with. The excess may be met by the Govt of the M.L.A in equal proportions. The opinion of the Chief Engineer (A) & Secretary on the above points may be called for.

furnishes his remarks
49) In view of the definite remarks furnished
by the C E for Roads & Bldgs on the above subject (the

letter of the C & for R & B, is for kind perusal), it is for orders whether the question of the underground drainage scheme be dropped and the first stage drainage portion be pursued

7149
L

50) Mr. Srinivasan A brief note on the facts of the cases the facts for orders may be put up from pl ing up for using before the Hon'ble Minister for PWD

51) The facts of the case are briefly as follows -

52) The construction of drainage at an estimated cost of Rs 39,930/ was sanctioned in G.O. no. L 8693-6/ml 7743-6 dated 18.2.44, the work being asked to be executed in stages. The cost was agreed to be met by the Govt and the Below Minor Municipal Council in equal proportions

A' & Collector file

53) On the same G.O. Sanction was accorded to the estimate for Rs 4,360/- representing the 1st stage of the scheme for completion during the year 43-44, the funds being made available by the Govt and the Municipal Council for the purpose.

54) When tenders were invited for the work by the Sanitary Engineer, no Contractor came forward to take up the work. Hence quotations were called for locally and the quotation of

one M. B S Keshavan mudaliy the lowest quoting 80/ over the Sanctioned estimate was Recommended for acceptance Suggesting also the Restriction of the work to the availability of funds, on the execution of the whole of the first Stage provided the excess of Rs 3,220/ involved according to these Revised Rates was agreed to be met ~~in equal proportion~~ by the Govt and the Municipality in equal proportion

56) The tender was forwarded to the Dy C, Harbour for ascertaining the Views of the Local Municipal Council who at their meeting held on 30 3 45 Resolved that the matter may wait till an estimate for underground drainage Requested of the Sanitary Engineer was Received

56) An estimate amounting to Rs 1,40,000/ for the underground drainage Scheme of Below town was prepared by the Sanitary Engr but the Ch Engr for Roads and Buildings Considered that the adoption of the improvement of water Supply to the town from the Vedavathi River at an approximate Cost of one lakh of rupees was a prerequisite to the adeption, an adequate water Supply was necessary for Satisfactory and Regular flushing of the drains He further Stated that even with the underground drainage Scheme

-B-

It would be necessary to provide storm water drains to drain off the rain water. Hence the Municipality in addition to financing the underground drainage scheme was required to invest money for the improvement of the supply of water to the town also

57) As this involved a heavy financial commitment on the part of the Municipality the Municipal Council was consulted for opinion on the Report of the Chief Engr. The Municipal Council agreed on their Resolution of 31.7.46 to pay 1/3 the cost of the underground drainage scheme and to spread the work over a period of 10 years so that their annual share of the expenditure might be reduced to Rs 4,666/- ~~may be~~ cost ~~immediately~~ payment without any adverse effect on the financial position of the Municipality. This decision however precipitated the dropping of the construction of storm water drains as the existing drains were considered adequate to serve the purpose, and also the water supply scheme which was bound to have already been completed at that time. Hence Government suggested that the Municipality should decide whether the present water supply was not sufficient to take up the scheme of underground drainage

58) The C.E. for Roads has now written letter dated 27-2-47 which has deprecately expressed

7149/L - (S-139)

himself has stated against the underground drainage Scheme for Belur and that surface drains would be cheaper and Satisfactory for the place

59) In view of the above it is for orders whether the question of the underground drainage Scheme be dropped and the 1st Stage drainage question be pursued

60) Noted

Re 20/3/47 61) Please note the population of Belur Municipality as furnished therein may be taken for the Budget Estimates for 1946-47 as sanctioned by the Dy Director

No. NLC 2577/46-47 Dt 20 5 47

Forwards a Copy of the Review on the Budget estimate of the Belur Municipality for 46-47

—

64) The Review ce for ward perusal the Flag 'S' abstract figures of the Sanctioned Budget for the year 46 47 are as follows —

opening Balance	—	Rs 19502/-
Receipts	—	Rs 23,032/-
Total	—	Rs 42,534/-
Expenditure	—	Rs 24,197/-
closing Balance	—	Rs 18,337/-

65) The population of Belur Town according Flag T to 1941 Census ce 3703

66) Subd with Reference to para 61 of the note Supra

the 20/5/47

67) Belur as a minor Mcl

. Its population according to the Census of 1941 is 3703

68) Its financial results according to the Budget for 46-47 is as shown in Item 64 supra

69) The question for consideration is whether execution of surface drains will do for the present or whether an underground drainage scheme should be taken up, in order to minimise the effect of malaria 7149/L

70) The estimate for the underground drainage to Belur Town comes up to Rs 1,40,000/- (Shown revised as Rs 151 270/-) X Ref "E"

Ml el have agreed to the scheme being taken up and are willing to contribute one third of the cost i.e. Rs 46,666/- in ten annual instalments The taking up of the scheme presupposes the existence of a good supply of water for flushing purposes.

71) The Chief Engineer for Roads & Buildings has expressed the view that, if the water supply to the Town could be improved at a cost of a lakh of rupees - as estimated by the Sanitary Engineer - the scheme of underground drainage might be taken up for that, even then, storm water drains have to be constructed to drain off storm water. He considers that

all towns with a population of less than 20000 and might give the underground drainage system, provided the Council agrees to meet half the cost of the scheme if the town has a good water supply

72 The Scheme must also agree to pay one third instead grants of the cost of the drainage scheme, these being executed in ten years. It urges that the scheme might be taken up in view of the fact that this is an important historical place in the Midland. It considers that the water supply scheme has already been executed that the existing dams will serve as storm water drains & that, if necessary the RDC will take up the execution of such dams

73 The D.C Bassadiss states that if the underground drainage scheme is considered necessary & important to control malaria it might be undertaken up, provided further improvement of water supply & other sanitary & sleeping sickness is not considered necessary, accepting the grants of one third of the cost promised by

the MLel & it would be able to pay the amt annually Otherwise he considers the cost to be prohibitive & the scheme will have to be postponed for the present

74) It will be seen from the above that there is difference of opinion among the MLel, the Director PW and the authorities of the PW Deptt & it would seem desirable, in the circs, for arriving at a common understanding on the subject that these authorities should meet together & discuss the matter threadbare & decide whether without further improvement of water supply, the present Drainage Scheme may be taken up, whether the existing drains would serve the purpose & also water drains for the present and whether, in case this Scheme is not taken up, the Surface Drainage Scheme may be taken up which has been sanctioned in G.O. dated 18th February last

7149/L - 279/Rev

may be pr executed from

Revenue) for
8/7 Mg

79) I agree with the above note But the cost of the proposed scheme will be Rs 1,51,290/-

The population of Belur Town is said to be only 3703, and the Municipality has no good financial resources also

It is therefore for orders whether the Surface Drainage scheme which is said to have been sanctioned as Ref 2 o Dated 18 2 42 might not be proceed with in the opinion of the E for R & B as underground drainage scheme is noteworthy in this connection

calls for information

Sus A 21-10-47

Letter No Mb R.C.1012/44-45 dt 13-12-47 from the Dy Commr, Hassan Dt. furnishing the information.

84) The Dy Commr, Hassan Dt is of opinion that if the underground Drainage scheme can be taken up without any improvement to the present water Supply, the scheme may be sanctioned. ~~Other~~ the question has to be

1779 V 3308

Continuation Sheet | File No / Current No | of | Page

dropped as the Belur minor mcl is unable to finance the scheme

85) The estimate for the underground drainage scheme is for Rs 51,290 and the mcl are agreeable to undertake the scheme. They are also of the opinion that the supply of water in the town is adequate.

86) The Sanitary Engineer is of opinion that more house connections for the supply water to houses have to be taken to work the underground drainage scheme

87) If appd, the Chief Engineer for Irrigation should also be Consulted in the matter

Submitted with reference to Para 80 supra

WKB 24/12

88) The Chief Engineer has already given his opinion on 14-11-46 (para 49) He and the Sanitary Engineer are afraid that the proposed underground drainage cannot be worked satisfactorily without influencing the town's water supply The Dy Comm states that the Municipal Council are unable to finance both the schemes

For 25-12-47 — 89) Pl note the financial condition of this mlf according to the sanctioned Budget for 1947-48

The financial condition of the Belur minor mcl for 1947-48 is as follows — for 18/11/48

Opening balance	Rs 12,692
Receipts	" 29,115
Total	Rs 41,807
Expenditure	Rs 39,840
closing balance	Rs 1,967

WD 06577—GPB—5 000

WKB 20/1 for 20-1-48

90) The Behrampur Municipality have resolved on 30/11/1947 ~~that~~ approving the revised estimate for Rs 1,57,290/- for the underground drainage scheme with the ground that the water supply is adequate for the existing system. The work is proposed to be executed in ten years & the Municipality has agreed to meet 1/3 of the above cost.

While no doubt the Municipality is entitled to secure the underground drainage they thought that the present water supply would be adequate & that at any rate the scheme, the facts are otherwise. The Sanitary Engineer states that the house connections are very few & that a large number of such connections are essential to work the underground system satisfactorily which requires improvement of pumping plant. The Chief Engineer for Buildings has stated that the cost of improving the present water supply would be lakh of rupees. The Dy Com has added that if this is essential, the Municipality is not in a position to provide funds both for the improvement of water supply and underground drainage & that the scheme may be sanctioned if the ~~scheme~~ loan can be taken up without

Below —

improvement to the Prison

The issue that ought to be dropped

the MC el is made to finance the

Scheme -

91) The technical opinion is against

the adoption of the proposal to carry out the

underground drainage system the premises of

the HQ are not sound, the expense

according to the Budget of Rs. 10,000 may be

more than three times further year. Having

regard to all the circs of the case

the MCel has, for the present, to

content itself with the surface

drainage scheme

This was sanctioned in the G.O noted

18th February 1911 for Rs 39,930/-.

The Chief Engineer for Roads & Buildings

may be requested to carry out this

work without any further delay

SIR,

Sub - Drainage Scheme of Belur Town - First Stage - Lowest Tender quoting 80% over the estimate

---

Adverting to G O No L 8693-6/M1 77-4346 dated 18th February 1944 sanctioning the estimate for Rs 39,900 for the comprehensive scheme and the estimate of Rs 4,360 for the first stage of the work, I have the honour to inform that tenders were called for by the Sanitary Engineer fixing the last date of receipt as 8 7 1944 But no tenders were received Therefore the Assistant Engineer, No 3 Sanitary Sub-Division, Hassan was requested to call for local quotations after giving due publicity

With his letter No 3495 dated 26th September 1944 the Sanitary Engineer has sent the quotations received from the local contractors of Hassan Out of the three contractors who quoted for the work, the quotation of Mr B S Keshavan Murthy the lowest, quoting 80% over the estimate This will result in an excess of Rs 3220 over the estimate of Rs 4360 The Sanitary Engineer suggests the acceptance of the lowest quotation which is 80% over the estimate and states that the quantities of work to be done will be restricted to the amount available

If the whole work of the first stage as per estimate is to be carried out at the above rate, the excess involved viz Rs 3,220 will have to be met by Government and the Belur Municipality in equal proportion

A copy of this letter is also sent this day to the Deputy Commissioner, Hassan for obtaining the views of the local body in the matter

I request you to be so good as to obtain and convey orders of Government in the matter

The quotations and the comparative statement received from the Sanitary Engineer in original and a copy of his forwarding letter are enclosed herewith for perusal

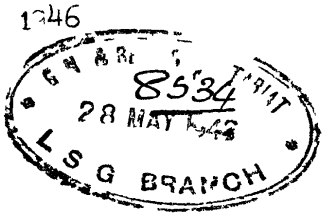
No 10183

Office of the Chief Engineer for Roads
and Buildings in Mysore,
Dated, Bangalore, the 24 May 1946



To

The Secretary to Government,
Revenue Department,
Bangalore

Sir,

Subject - Underground drainage scheme to Belur Town -

With reference to your letter No L 12900 dated the 20th May 46, re the above subject, I have the honour to state that no part of the surface drainage scheme of Belur town, sanctioned in G O No L 6693-6/ M1 77-43-1o dated 18th February 1944 has so far been executed, on account of the very high cost of the tender received, viz , 80% over the sanctioned estimate

2 An estimate amounting to Rs 1,40,000/- for the underground drainage scheme of Belur Town has been prepared by the Sanitary Engineer It will be submitted to Government for orders very soon, after obtaining the opinion of the Director of Public Health

3 Belur Town has the advantage of a good source of water supply, viz , the Vedavathi river If the water supply to the town is improved (the cost of improvements is estimated by the Sanitary Engineer roughly at Rs 1 00 lakh) the underground drainage scheme can be adopted Even with the underground drainage scheme it would be necessary to provide storm water drains to drain off the rain water The Municipality must be in a position not only to finance the underground drainage scheme costing Rs 1 40,000/- but also the cost of improvements to the water supply

4 In this connection, it has to be stated that of late every Municipality of the Deputy Commissioner have been asking for underground drainage schemes irrespective of the fact that in many cases the Municipalities are unable to bear the cost, and there is no adequate water - supply for satisfactory and regular flushing of the drains In the case of most of the Taluk or District Head Quarters, it would be sufficient if surface drains are constructed as the underground drainage schemes require adequate water supply and also costs 2½ to 3 times the cost of the surface drainage Even when underground pipes are laid, storm water drains would have also to be provided

5 It is therefore necessary that a definite ruling is given by Government in the matter In my opinion for all towns, with a population up to 20,000, the surface drains may be constructed and for those with a population of more than 20,000, underground drainage system may be adopted provided the concerned municipality agrees to meet half the cost of the scheme, and the town has a good water supply

6 This disposes of your No L 1042 dated 3rd September 1945 and subsequent reminders

I have the honour to be,
Sir,
Your most obedient servant,

W B Dafaat
Chief Engineer for Roads
and Buildings

To

The Secretary to Government,
Revenue Department,
Bangalore

Sir,

Re Construction of underground drainage in Belur Municipality

With reference to your letter No L 1477 dated 29 6 1946 calling for the opinion of the Municipal council on the report of the Chief Engineer re the construction of underground drainage in Belur Town, I have the honour to state as follows -

In the letter dated 24 5 46 of the Chief Engineer for roads and buildings it is stated that an estimate amounting to Rs 1,40,000/- for the underground drainage at Belur has been prepared, that this scheme can be accepted if the water supply to the town is improved at a cost of about Rs 1 00 lakh and that in addition storm water drains have also to be provided to drain off rain water

The Municipal council have agreed in their resolution dated 31 7 46 to pay 1/3 cost of the underground drainage scheme to be completed in 10 years, the balance of cost being met out of Government in view of its poor finance The Municipal president was requested to intimate how the Municipality proposes to meet the cost of one lakh of rupees estimated for improving water supply and also the cost of storm water drains In their resolution dated 29-8 1946 the Municipal Council have resolved that Rs 2180/- has already been placed at the disposal of the Sanitary Engineer towards surface drainage, that the balance amount required towards underground drainage will be made available each year, that water supply scheme has already been closed and that existing drains will serve as storm water drains etc, The Chief Engineer has said that underground drainage may be adopted if the town gets good water supply The cost of improving the water supply is estimated at one lakh of rupees but the Municipality is of opinion that water supply scheme has already been completed Therefore the Sanitary Department has to decide definitely whether the present water supply is not sufficient to undertake the construction of underground drainage or whether further improvement is absolutely necessary In the former case the Municipality will have to provide 46,666/- or Rs 4666/- annually for 10 years to raise 1/3 of the cost of underground drainage as agreed to by them if the construction of storm water drains could be dropped

The income and expenditure of this Municipality for the last 3 years is noted below

	Income	Expenditure
1943-44	15597/-	14783/-
1944-45	18792/-	14397/-
1945-46	15518x/-	13068/-

According to the sanctioned budget for 46-47 the closing balance of the Municipality is expected to be Rs 18337/- and it has an investment of Rs 13577/- in the Saving Bank

A loan of Rs 11500/- has been sanctioned in G O No 1.7280-39 ml 168-38-5 dated 8 3 39 towards water supply scheme which is repayable in 20 annual instalments The instalment has not been fixed and no amount has been repaid so far The annual instalment will be about Rs 600/- which the Municipality can afford to pay in their present financial condition

In the above circumstance the Municipality may be able to provide their quota (1/3 of the cost) annually to drain underground drainage scheme Belur is a historical place noted for festival of Sree Channakeshavaswamy is held annually when a number of devotees will congregate at the place If the underground drainage scheme is

considered necessary as an important measure to
without undertaking further improvement of water
estimated cost of one lakh of rupees, the scheme be
ascertaining the Municipal contribution of the estimated
with the cost is prohibitive and the question will be
~~dropped till~~ Postponed until the situation improves.

The resolutions of the Municipal Council together
plans and estimates are herein enclosed.

I have the honour to be,
Sir,
Your most obedient servant,

OFFICE OF Chief Engineer for Roads & Buildings in Mysore

To Mr Regional Assistant

Date 27-2-47

The Secretary to Government,

Revenue Department, BANGALORE

Sir,

Re - The underground drainage scheme to Belur town

With reference to your letter No L 6037/Encl dated the 14th November 1946 requesting to furnish my definite remarks in the above matter in view of the report of the Deputy - Commissioner, Hassan District, I have the honour to state that I am definitely against the underground drainage scheme for Belur, as it will be necessary to provide surface drains in addition to dispose of storm water

The underground drainage may or may not go a long way to diminish malaria and without adequate water supply - the underground drainage scheme will be inefficient

It is therefore considered that surface drains would be cheaper and sufficient for Belur Town

Construction of underground Drainage at Belur

With reference to your letter No L 1123 dated 18-7-1947 on the above subject, I have the honour to forward herewith an estimate amounting to Rs 1,51,290/- together with the plans for the above work as called for in your letter cited above

2 In the original estimate amounting to Rs 1,40,000/- for the work, provision was made for three outfalls as the Director of Public Health desired that the number of outfalls should be reduced, the estimate was revised reducing the outfalls to two and this has resulted in an increase of Rs 11,290/- the total amount of the estimate being Rs 1,51,290/-

3 In this connection, kind reference is invited to this office letter No 7501 dated 27-2-1947 wherein it is stated that the underground drainage may or may not go a long way to diminish malaria and without adequate water supply, the underground drainage scheme will be inefficient

I have the honour to be,
Sir,
Your most obedient servant,

Chief Engineer for Roads and Buildings

Docket Abstract

Construction of underground drainage at Belur

Sir,

With Reference to your letter No MPC 1012/65 46 dated 6 10 46 on the above subject I am directed to forward herewith a copy of letter No 34/10 dated 24 9 47 Received from the Chief Engr for R & B and to request you to furnish your considered opinion as to whether the underground drainage Scheme for the purpose of at Belur the estimate for which has been revised to Rs 1,51,290/- has to be proceeded with and if so, whether the Municipality will be able to finance such a Costly Scheme As the Chief Engr considers that adequate water supply is necessary for the efficient working of the underground drainage System, it may also be examined whether the existing water supply Scheme in the town is adequate to meet the needs of the drainage Scheme also

A very early reply is requested

Yours faithfully
for Chief Engr

SECRETARY GOVERNMENT OF MYSORE

Sir,

Re Construction of underground drainage at Belur

With reference to your letter No L 1035-9 dated 20-10-1947 calling for my opinion re the execution of underground drainage at Belur at a cost of Rs 1,51,280/- as per revised estimate, I have the honor to state as follows -

The Chief Engineer is of opinion that the underground drainage may or may not go a long way to diminish malaria and without adequate water supply this scheme would be inefficient The Municipal Council of Belur was consulted in the matter and they have resolved in their meeting held on 30th November 47 approving the revised estimate They have also stated in this resolution that water supply is adequate and the President is of the same opinion The Municipal President has further stated that the open drainage may give room for stagnation of water whereby malaria will be on the increase and that therefore the underground drainage is necessary though costly The Sanitary Engineer has intimated that the house connections are very few and that larger number of such connections are essential to work the underground system satisfactorily which requires improvement of pumping plant etc A copy of his letter No 547 dated 6-12-47 is enclosed for favour of perusal The Chief Engineer for roads and buildings has already mentioned in his letter No 10185 dated 24-5-46 addressed to Government that the cost of improving the present water supply would be one lakh of rupees If this is quite essential the Municipality is not in a position to provide funds both for the improvement of water supply and underground drainage

In the above circumstances I am of opinion that if the underground drainage scheme can be taken up without any improvement to present water supply, the scheme may be sanctioned, otherwise the question has to be dropped as the Municipality is unable to finance the scheme

I have the honor to be,
Sir,
Your most obedient servant,

Deputy Commissioner,
Hassan District 13/12

Letter No 547 dated the 6th December 47 from the Sanitary Engineer, Bureau of Sanitary Engineering, Bangalore, to the Deputy Commissioner, Hassan District

---

Re - Underground drainage scheme for Belur Town

With reference to your letter No L C 1012/44-45 dated 15-11-47 addressed to the President, Municipal Council, Belur, forwarding copy of same to the Asst Sany Engineer, Hassan, and calling for his opinion as to whether the underground drainage scheme, now under contemplation, could work satisfactorily with the conditions of water supply now obtaining in the town, I have the honor to state as follows -

The consumption of water according to present conditions of supply is varying between 24000 to 30000 gallons per day for a population of 5000 This works out to 5 to 6 gallons per capita per day This is far below the required quantity to efficiently work the underground drainage system

The existing house connections are very few in number and since the last one or two years no fresh house connections are being taken due to high prices for materials Larger number of house connections are essential to ensure higher consumption in order to work the underground drainage system satisfactory This in turn necessitates the capacity of the pumping plant, hours of pumpage and laying of sub mains in localities where they do not now exist in order to facilitate taking house connections by the general public Unless these conditions are fulfilled, I am of the opinion that it serves no purpose to lay the underground drainage system for the present till the improvement to water supply are effected and consumption increase
